***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-19, drawn to semiconductor laser apparatus and process of making the same, classified in class 372, subclass 99.
  - II. Claims 20-21, drawn to method of manufacturing a different semiconductor laser device, classified in class 438, subclass 22.
  
2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the method of manufacturing the semiconductor laser in group II does not require a second mirror including a layer of which an optical thickness is  $m_1 \lambda/2$  and an optical thickness of a reflectivity adjustment layer being  $(2m_2-1) \lambda/4$  where  $m_1$  and  $m_2$  are natural numbers. Furthermore, the semiconductor laser as recited in claim 1 does not require to include a first electrode formed on the upper surface of the resonator as well as having an aperture.
